Compliance Innovations & AppHQ

Discover Ease

Compliance is proud to offer our AppHQ, an eDiscovery marketplace where clients can select any tools in the Compliance arsenal, on a case-by-case basis, and add them to their base environment as needed. The AppHQ has many third-party software applications, such as NexLP, H5's Matter Analytics, Heretik contract analysis software, X1 Enterprise Collect, and of course, our Compliance Innovations – customized technology and integrations developed specifically to enhance your experience within the Relativity platform. Compliance Innovations allow for a streamlined eDiscovery process and provide enhanced document review, insight, and accessibility unlike any other platform. Compliance is dedicated to creating the tools and functionality needed to help you master your eDiscovery process.

Compliance Innovations include:

CI Login: Comprehensive and customizable Single Sign-On and Multi-Factor Authentication platform utilizing Okta that enables client administrators to tailor their advanced security settings and gives clients a white-labeled landing page.

CI Support: Communicate with our helpdesk, project management, and techs directly without ever having to leave the DaaS platform.

CI Access: High-speed, high-volume data transfers using Aspera, along with Citrix access to Remote Desktop for use of the Relativity Desktop Client.

CI Archive: Archive and restore workspaces with just a few clicks.

CI Admin: Manage and create Relativity users, groups, matters, workspaces, and audits.

CI Translate: Remove the language barrier with this integrated machine translation tool.

CI Processing: Upload and process data directly from your desktop with a single "drag and drop" – a Relativity Innovation Award Finalist!

CI Processing Pro: Automate Nuix processing and Relativity ECA workflow with the Rampiva automation engine and Compliance's proprietary workflows

CI Click: Single-Click Multi-Select coding shortcut tool to avoid repetitive coding clicks.

CI Discussion: Manage team and case communications directly in Relativity with built-in tracking, alerts, and email notifications.

CI Insight: Audit and monitor client data metrics directly from custom dashboards, with new enhancements using Microsoft's Power BI Business Analytics Tool.

CI Media: Transcribe, translate, and redact media files, backed by the power of Veritone.

CI Privilege: Generate standardized names and formats for your privilege log.

CI Redactions: Automate bulk redactions or redact native excel spreadsheets with ease.
