

# CI Migrate

## Migrate to RelativityOne With Ease

CI Migrate, a proprietary automation tool from the Compliance Innovations Lab, gives you the ability to migrate a workspace from a Relativity server to RelativityOne with a single click.

Migrating to RelativityOne is now a better experience. With CI Migrate, the newest app from the Compliance Innovations Lab, you can migrate workspaces with unparalleled ease and simplicity. With a single click, CI Migrate automates migration and delivers an unpackaged RelativityOne workspace, ready to go and hassle-free - no expertise required.

CI Migrate is a proprietary tool available to Compliance Discovery-as-a-Service (DaaS) clients and Relativity partners, and is available for download through AppHQ, Compliance's self-service technology marketplace. CI Migrate enables a hands-free migration process, from the creation of an ARM to its restoration in your newly-unpackaged Relativity One workspace. It uses multithreaded transfer methods and avoids the common issues associated with a standard ARM transfer by eliminating cumbersome steps and tasks that make migrations energy-intensive and stressful.

### In one click, CI Migrate:

**You now have an active RelOne workspace in the Azure cloud.**

Compliance has been a proud partner of Relativity for more than seven years and is a certified RelativityOne Silver Partner, performing thousands of workspace migrations to Relativity's on-premise and cloud instances. Our experienced team of Relativity certified professionals, including Relativity Certified Administrators, Relativity Certified Infrastructure Engineers, and Relativity Masters, has logged hundreds of thousands of hours of Relativity support as they empower our clients to optimize their eDiscovery experiences in Relativity.

The Compliance Innovations (CI) Lab uses the latest technologies to create proprietary tools and workflows for RelativityOne. With a strong focus on simplification, integration, and accessibility, Compliance's apps deliver an unparalleled experience that automates repetitive actions and simplifies the eDiscovery process. CI Migrate, our latest app, is now available for download.
