

Case Study: Antitrust

Compliance provided project management and a review team to a law firm client during an antitrust litigation, helping manage the flow of review data and track production sets by custodian.

Client Challenge

For an antitrust litigation within the media and communications field, our law firm client engaged Compliance as an extension of its team to help manage the flow of review data and properly track production sets by custodian.

Compliance Solution

Our law firm client was so pleased with the quality of the review team's work that it asked seven reviewers to continue working on the project for nine months after the initial review was complete, in order to prepare a detailed privilege log, witness kits, deposition, and ultimately, trial preparation. Two of these Compliance candidates are now permanent employees with the law firm client.
