We're serious about security.

The security of your data and safeguarding of your information is of paramount importance, and we are committed to the highest standards across our enterprise. We employ strict internal protocols, controls and monitoring, and have been vetted by the most rigorous corporations and independent third-party auditors.

Compliance is among the few eDiscovery companies to achieve ISO 27001 status, as well as certification and compliance with GDPR, HIPAA, and ITAR regulations. We maintain operations at only Tier IV or higher data centers with SOC audits, and mandate that cloud hosting partners maintain their own ISO and SOC status. Our security protocols reflect best practices and are always evolving to address new threats, regulatory changes, technology updates, and client requirements, for complete confidence and peace of mind.
